

South Milwaukee Fire Department Multi-Station SCBA Confidence Training Prop

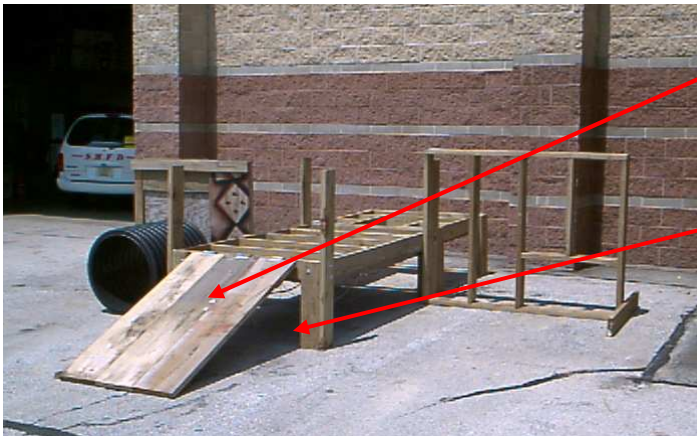

This training prop is designed to provide realistic challenges that may be encountered on the fireground with the intent of providing both a learning atmosphere to instruct the proper way to address certain situations and as a personal evaluation tool so they personally can judge their levels of confidence and competence. Several of the props are based on real-life fireground scenarios.

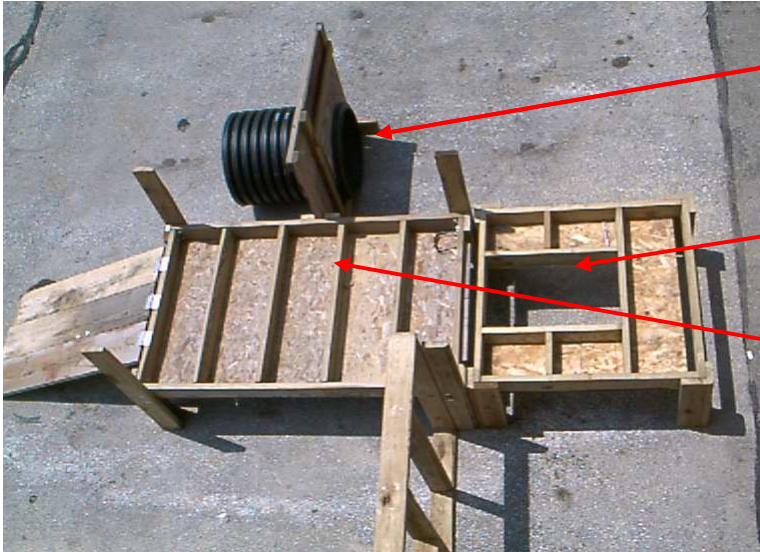

Props available on the set-up as pictured:

- Attic scuttle
- Rafter crawl
- Low profile – horizontal
- Low profile – vertical (16" o.c.)
- Downward ramp
- Narrow passage (24" tube)
- Reduced clearance (angled)
- Wire entanglement

Additional training tools possible:

- Hoseline / search rope follow
- Hose coupling identification
- Wall breach (with addition of drywall sections)

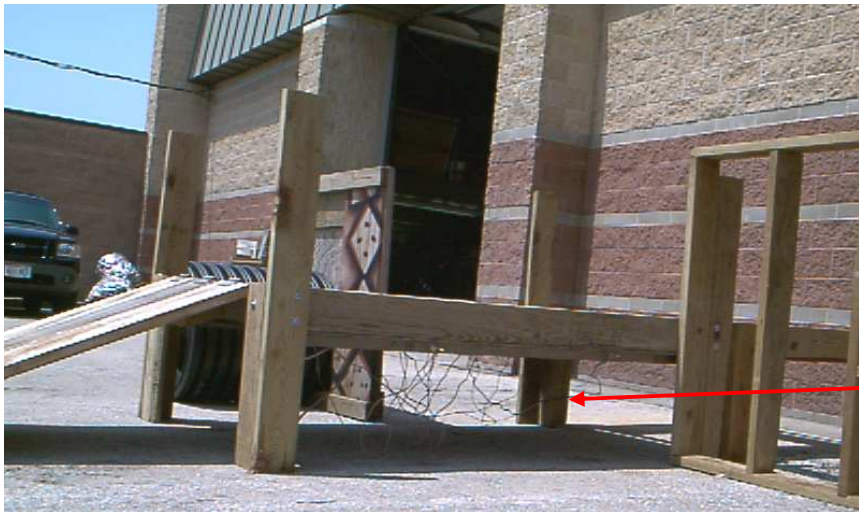

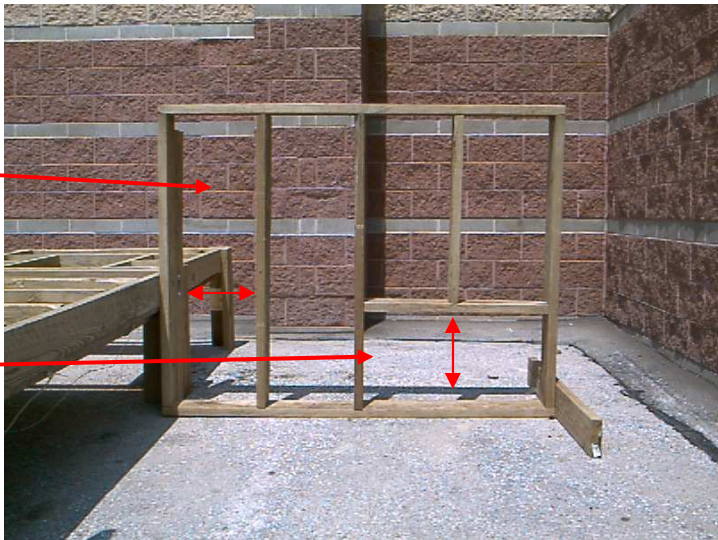

Narrow Passage

Attic Scuttle
